Ibrohim Abdivokhidov

Software Engineer

Uzbekistan

English, Russian, Uzbek

Profile Completion: 100%

Employment history

Upwork

Position: Freelance Software Engineer

Duration: 01.01.2024 - 01.03.2024

Location: Uzbekistan

- Developed a mobile app for GreenWay Logistics using Flutter, Dart, and GraphQL, which reduced the time required for generating reports by 60%, enhancing operational efficiency. - Automated over 10 different workflows for GreenWay Logistics using Zapier, Python, Telegram API, and GraphQL, streamlining operations and improving response times. - Successfully delivered over 10 services for GreenWay Logistics with a 100% success rate, ensuring high client satisfaction and consistent service quality

lablab.ai

Position: AI Technical Mentor

Duration: 01.02.2023 - 01.03.2024

Location: Uzbekistan, Tashkent (remote)

- Provided guidance and mentorship to over 10,000 teams of AI enthusiasts, innovators, and developers at Lablab.ai, enhancing their ability to solve technical challenges and achieve project goals through dedicated support and expert advice. - Established comprehensive best practices and validated over 1,500 AI ideas and prototypes, facilitating technical mentoring sessions and integrating new members into teams, thereby accelerating innovation and collaboration. - Actively participated in weekly and monthly strategy calls with the Lablab.ai team and mentors to identify and integrate emerging trends, best practices, and cutting-edge technologies, ensuring our community remains at the forefront of AI advancements.

Souk

Position: FullStack Flutter Developer Intern

Duration: 01.04.2023 - 01.11.2023

Location: Uzbekistan, Tashkent, (remote)

- Collaborated closely with the Founder & CEO of Souk, facilitating daily communications via Zoom, Google Meet, and Discord to align development efforts with strategic business objectives. - Acquired hands-on experience in building real-world scalable software applications under the mentorship of Souk's Founder & CEO, enhancing my proficiency in advanced software development techniques. - Enhanced the performance of Souk's mobile app by 60%, ensuring smooth operation across various devices by optimizing with Flutter, Dart, Redux, and GraphQL. - Developed over 50 reusable widgets and effectively separated business logic from UI, significantly improving code maintainability and application scalability at Souk. - Built a comprehensive admin panel to control the app using Next.js, TypeScript, JavaScript, Redux, and Tailwind CSS, which streamlined app management and enhanced administrative operations.

lablab.ai

Position: AI Technical Mentor

Duration: 01.02.2023 - 01.03.2024

Location: Uzbekistan, Tashkent (remote)

- Provided guidance and mentorship to over 10,000 teams of AI enthusiasts, innovators, and developers at Lablab.ai, enhancing their ability to solve technical challenges and achieve project goals through dedicated support and expert advice. - Established comprehensive best practices and validated over 1,500 AI ideas and prototypes, facilitating technical mentoring sessions and integrating new members into teams, thereby accelerating innovation and collaboration. - Actively participated in weekly and monthly strategy calls with the Lablab.ai team and mentors to identify and integrate emerging trends, best practices, and cutting-edge technologies, ensuring our community remains at the forefront of AI advancements.

Portfolio

Truck ReportMe
https://github.com/abdibrokhim/monday.com-flutter-app-for-lgstcs

Truck ReportMe is an App that Automates Truck Reports in Logistics.

Truck Simulator
https://github.com/abdibrokhim/TuckSimulator-unity

Truck Simulator is classic game Powered by Unity.

CrunchGPT
https://github.com/abdibrokhim/CrunchGPT-SwiftApp-Redux-Firebase/

CrunchGPT transforms the way users interact with educational content.

Monday.com AI Assistant
https://github.com/abdibrokhim/monday.com-ai-assistant-hackathon

Monday.com native that allows to run queries instantly. Now, you don't need to open Postman or Code editor to make queries to Monday.com API.

YTShorts
https://github.com/abdibrokhim/ai-mental-health

An App where everyone can generate YouTube shorts or even long Videos in seconds ?.

Lychee
https://github.com/abdibrokhim/Lychee

Lychee - Learn from YouTube videos like never before with AI Powered website.

Generate & Deploy NFT's

https://github.com/abdibrokhim/cw3d-AlchemySDK

GenNFT, allows users to seamlessly generate and mint custom NFTs.Leveraging the robust Alchemy SDK.

Glanz -Fashion & Beauty

https://vimeo.com/900519656

Glanz, our innovative mobile app, transforms online shopping into an interactive and personalized experience.

WeShot

https://github.com/abdibrokhim/Social-Media-App-Flutter-Redux

Welcome to WeShot, the ultimate social media haven where your moments aren't just shared, they're celebrated.

ChatGPT4-Rust-Desktop-App

https://github.com/abdibrokhim/ChatGPT4-Rust-Desktop-App

ChatGPT4-Rust-Desktop-App

Alert Me

https://github.com/abdibrokhim/Flutter-Send-Location-via-SMS

Flutter based cross-platform application, that sends location to selected user in emergency situations.

Qarzsiz

https://github.com/abdibrokhim/qarzsiz

Qarzsiz, a cross-platform application, in mission empower rural (villages) markets.

Flutter Cohere package

https://github.com/abdibrokhim/flutter_cohere

This package provides a powerful bridge between your Flutter application and Cohere AI. It empowers you to seamlessly integrate Cohere's capabilities.

BeatSaber VR Game

https://github.com/abdibrokhim/BeatSaber-VR-Game

BeatSaber VR Game, powered by Unity and Blender. You can play on Meta Quest 2.

ChatGPT3.5 Flutter App

https://github.com/abdibrokhim/ChatGPT3.5-Flutter-App

ChatGPT3.5 Flutter App, cross-platform application. Access to all OpenAI models.

ChatGPT-TelegramBot

https://github.com/abdibrokhim/ChatGPT-TelegramBot

ChatGPT-TelegramBot
