

Sukhrob Turaev

Python Backend Developer

Uzbekistan, Tashkent | +998909631251 | suhrobturaev2004@gmail.com | [LinkedIn](#) | [GitHub](#)

WORK EXPERIENCE

November 2023 – April 2024

I participated in a real project for an insurance company

Website: imkonsugurta.uz

Key Contributions:

- Designed and developed **database models** for managing core application logic and data structures.
- Implemented **multi-language support** to ensure the website caters to diverse user demographics.
- Created custom **views for the news section**, enabling dynamic and user-friendly content updates.
- Developed a **send message function** to enhance user interaction and communication functionality.
- Customized the **admin interface using Django Jazzmin**, improving the user experience for administrative tasks.

October 2024 – Current

Backend Developer Intern | [UIC Group](#) | Tashkent, Uzbekistan

Work for a company that offers digital solutions to organizations of any challenge. I provide a range of services including performance optimization, big data, API development.

Key Responsibilities:

- **SamOsh Telegram Bot (@samoshrobot):**
 - Developed functionality to filter orders by regions and branches.
 - Implemented total price calculation based on the selected filters.
- **Kitob Challenge Telegram Bot (@kitob_challenge_bot):**
 - Created features to track and display daily, weekly, monthly, and yearly top readers based on pages read.
 - Designed and implemented the user registration process for the bot.
- **Geolocation Services with Python:**
 - Utilized the `geopy` library to handle geolocation data, including:
 - Fetching address details from latitude and longitude values.
 - Retrieving latitude and longitude from given addresses.
 - Implemented a location search feature for enhanced usability.
- **Phone Number Validation Functionality:**
 - Developed a Python function using the `phonenumbers` library to identify phone number origins.
 - Enabled support for UZB (Uzbekistan) and USA numbers, returning corresponding country codes.

EDUCATION

September 2021

Tashkent University of Information Technologies
Bachelor, Computer Engineering

Graduation Date: May 2025

March 2023

Full Stack Python | Mohirdev online platform

- Distinguished member of Web developers
